3.1mm fixed lens thermal turret with built in Bi-spectrum, strobe light & audio alarm

DS-2TD1228-7/QA
6.9mm fixed lens thermal turret with built in Bi-spectrum, strobe light & audio alarm

Features:
- 256 × 192 resolution, 12 μm, VOx UFPA, NETD < 40 mK (25°C, F1.0)
- Video content analysis: vehicle/human classification
- Temperature exception alarm for fire prevention, -20°C to 150°C (-4°F to 302°F), ± 8°C (± 14.4°F)
- Image processing technology: linear, histogram, self-adaptive thermal AGC mode, DDE, 3D DNR

Bracket Options:
- *DS-1280ZJ-DM21 Junction box*
- *DS-1273ZJ-140 Metal wall mount*
- *DS-1475ZJ-SUS Vertical pole mount*
- *DS-1476ZJ-SUS Corner mount*

Camera requires an external power source to function

Without PoC

Up to 200m

With PoC

Transmits both HD video & power over the same coax cable
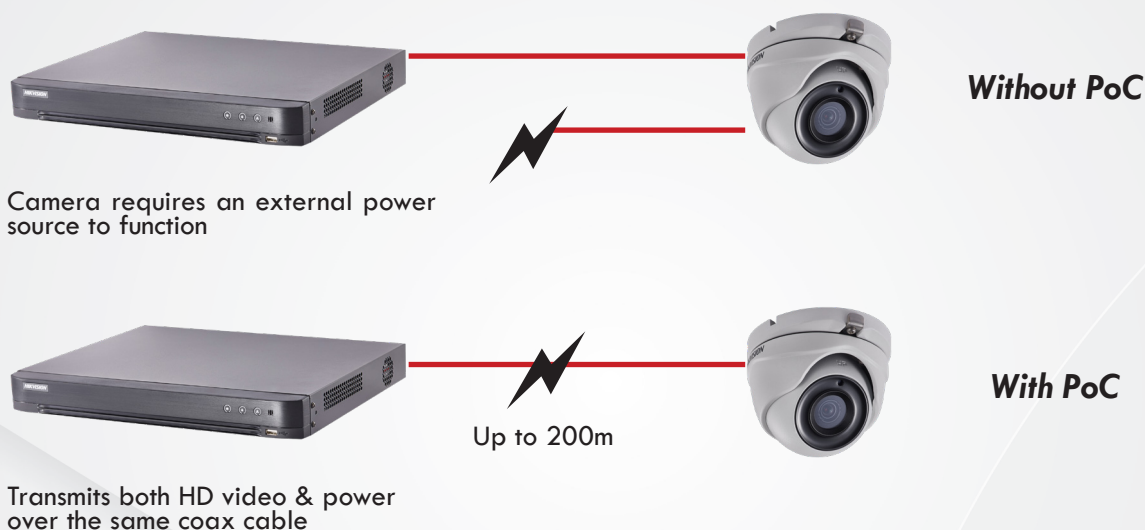

Hikvision, the world's leading supplier of innovative video surveillance products and solutions is further advancing surveillance camera technology by introducing Power over Coaxial to its TVI cameras and DVRs.

This makes installing the cameras a lot simpler which is great news for installers.

Power over Coaxial (PoC) basically means that power for the camera is supplied by the DVR via coaxial videocable (RG59 or similar), this removes the requirement for separate cables and power supplies which would otherwise be needed to power your cameras. For installers this means a much more time and cost efficient installation.

PoC can be used on cable runs up to 200 metres and is available in 4,8 and 16 channel DVRs (models ending /P), a full complement of TVI PoC cameras are also available (models ending E) which together offer a cost effective and time saving solution to your TVI installations.

PLEASE NOTE:
1. All PoC capable TVI cameras can be powered locally via a separate power supply allowing them to be used on a none PoC TVI DVR

2. All none PoC TVI cameras can work on a PoC capable TVI DVR as the camera is powered via a separate power supply and PoC will only transmit when requested to by a compatible camera

3. PoC transmission has generally been used through RG59 coaxial or similar cable, however with the release of our HAY-HDVB01POC-PT (see page 78) it can now also be used through CAT5 offering even greater flexibility of install.

- Supports PoE power up to 30W for each PoE port
- 67W PoE total budget power

TL-SF1008P

8-Port 10/100Mbps Desktop Switch with 4-Port PoE

- 4 PoE ports, transfers data and power on one single cable
- Supports PoE power up to 15.4W for each PoE port
- 66W PoE total budget power

TL-SF1009P

9-Port 10/100Mbps Desktop Switch with 8-Port PoE+

- 8 PoE+ ports, transfers data and power on one single cable
- Supports PoE power up to 30W for each PoE port
- 65W PoE total budget power

TL-SL1311MP

8-Port 10/100Mbps + 3-Port Gigabit Desktop Switch with 8-Port PoE+

- 8 PoE+ ports, transfers data and power on one single cable
- Supports PoE power up to 30W for each PoE port
- 124W PoE total budget power

TL-SL1218MP

16-Port 10/100Mbps + 2-Port Gigabit Unmanaged PoE Switch

- 16 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 192W total PoE budget
- 2 × gigabit SFP fiber optical port

TL-SL1226P

24-Port 10/100Mbps + 2-Port Gigabit Unmanaged PoE+ Switch

- 24 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 250W total PoE budget
- 2 × gigabit SFP fiber optical port

TL-SL2428P

24-Port 10/100Mbps + 4-Port Gigabit Smart PoE+ Switch

- 24 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 180W total PoE budget
- 2 × gigabit SFP fiber optical port

TL-SG108PE

8-Port Gigabit Easy Smart Switch with 4-Port PoE
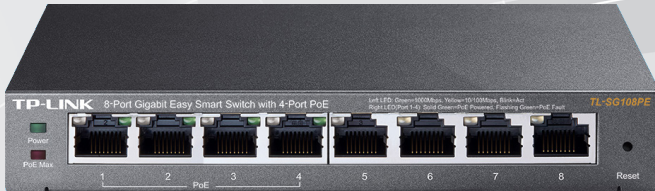

- 4 PoE ports, transfers data and power on one single cable
- Supports PoE power up to 15.4W for each PoE port
- 55W PoE total budget power

TL-SG2210P

JetStream 8-Port Gigabit Smart PoE+ Switch with 2 SFP Slots

- 8 ports of 802.3af-compliant PoE
- Supports PoE power up to 15.4W for each PoE port
- 53W PoE total budget power
- 2 × gigabit SFP fiber optical port

TL-SG1008MP

8-Port Gigabit Desktop/Rackmount Switch with 8-Port PoE+

- 8 PoE ports, transfers data and power on one single cable
- Supports PoE power up to 30W for each PoE port
- 124W PoE total budget power

TL-SG1218MP

18-Port Gigabit PoE Switch with 16-Port PoE+

- 16 PoE ports, transfers data and power on one single cable
- Supports PoE power up to 30W for each PoE port

TL-SG1218MPE

16-Port Gigabit Easy Smart PoE Switch with 16-Port PoE+

- 16 PoE ports, transfers data and power on one single cable
- Supports PoE power up to 30W for each PoE port
- 250W PoE total budget power

TL-SG2428P

JetStream 28-Port Gigabit Smart PoE Switch with 24-Port PoE+

- 24 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 250W PoE total power budget
- 4 × gigabit SFP fiber optical port

TL-SG3428MP

JetStream 28-Port Gigabit L2 Managed Switch with 24-Port PoE+

- 24 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 384W PoE total power budget
- 4 × gigabit SFP fiber optical port

TL-SG3452P

JetStream 52-Port Gigabit L2+ Managed Switch with 48-Port PoE+

- 48 ports of 802.3at/af-compliant power over Ethernet
- Supports PoE power up to 30W for each PoE port
- 384W PoE total power budget
- 4 × gigabit SFP fiber optical port

TL-SG105
10/100/1000 Mbps Desktop Switch
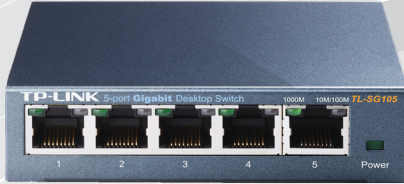

- 5 10/100/1000Mbps Auto-Negotiation RJ45 ports supporting Auto-MDI/MDIX
- IEEE 802.3x flow control provides reliable data transfer
- Plug & Play, no configuration needed

TL-SG108
8-Port 10/100/1000Mbps Desktop Switch

- 8 10/100/1000Mbps Auto-Negotiation RJ45 ports supporting Auto-MDI/MDIX
- IEEE 802.3x flow control provides reliable data transfer
- Plug & Play, no configuration needed

TL-PA4010PKIT
AV500 Powerline Adapter with AC Pass Through Kit

- Data transmission rates up to 500Mbps over electrical wires, ideal for HD video streaming
- Integrated power socket making sure that no power outlet is going to waste
- Plug and play design and easy encryption on a push of pair button
- Power-Saving Mode automatically reduces power consumption by up to 85%

Dynamic CCTV Project Tokens are designed to help you get the very best pre- and post-sales support from our award winning technical and project support team. The tokens can be used when additional support is needed throughout the design, setup and commissioning process of your project or Hik-central VMS installation. The aim of our Project Support Token scheme is to give all our clients the peace of mind that a member of our dedicated project team is at hand waiting to give that extra level of value-added support throughout your project from inception to completion.

The tokens are purchased in 4HR and 1HR units and are used as time credits within your project account, they are not locked to a specific project and do not expire giving you the flexibility to decide when you use them and on which project.

The Project Support Tokens can be redeemed for the following value added services:

- Assistance with documentation and design schematics
- Pre-configuration and setup of systems before leaving Dynamic CCTV headquarters
- Remote custom training for both engineers and/or end users
- Remote dial in to setup or assist with commissioning HikCentral VMS systems and associated modules
- Bespoke user guides both written and video where required.
- Prioritized support on mission critical systems

All remote dial in sessions are managed through a booking service where you will be allocated a time slot within a 48-hour window. Contact: project@dynamic-cctv.com if you wish to make a booking.

When the session is complete the time taken will be deducted from your token time credits within your project account. Dynamic CCTV pride ourselves in being able to support your needs and the project token scheme adds even greater weight that Dynamic CCTV is the first choice for all your project opportunities, our dedicated project team is here and waiting to support you.

Contact project@dynamic-cctv.com for further information on this scheme or if you have a project opportunity you would like to discuss with us.
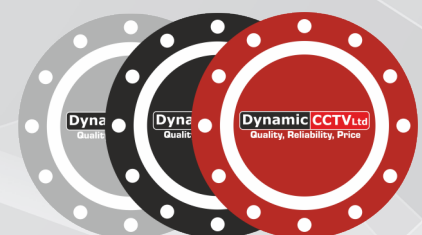

Software Only

Software & Hardware Hikvision Solution
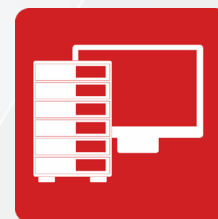

Software & Dynamic Hardware Solution

Hik-Central is a licenced open platform Video Management System (VMS) that is developed by Hikvision, the software is customisable through modules allowing you to build your system at the design stage integrating many different hardware technologies to achieve the exact required functionality needed on site. Integration with third party hardware is also possible through the systems open platform and optimus platform.

Hik-Central combines video, data and intelligence analytics across a variety of security technology sectors to deliver a fully integrated solution which can be utilised on a grand scale to meet even the most demanding of site requirements.

Hik-Central represents a new breed of surveillance component modules, a system that is continuously evolving and is designed to deliver a multitude of smart applications over a wide expanse of industries.

Dynamic CCTV offer full pre-sale support on all your Hik-central requirements, we have the experience and expertise to assist you in building a hik-central solution both software and hardware to meet your exact site needs, contact project@dynamic-cctv.com to register your hik-central opportunity.
